

## Name : Mallikarjunappa Bhogade

D.O.B : 2nd Oct. 1985

Mobile No. : +91 8793590288

email id : bhogademv@gmail.com

City : Solapur pin code : 413001

State : Maharashtra County : India

Role : Sr. Software Engineer - Java

Total Experience: 6.6 years

\* I am an immediate joiner

## Work History

### Skills

- ◆ Core Java ●●●●○
- ◆ Spring Boot ●●●●○
- ◆ Hibernate / JPA ●●●●○
- ◆ Microservices ●●●●○
- ◆ REST Api ●●●●○
- ◆ PostgreSQL ●●●●○
- ◆ MySql ●●○○○
- ◆ AWS ●●○○○
- ◆ Kotlin ●●○○○
- ◆ NestJS ●○○○○

### Certifications

- ◆ DevOps basics May 2021
- ◆ Intro to Generative AI Aug 2023
- ◆ ChatGPT promt Engg. Nov 2023

### Educational Qualification

- ◆ M-Tech : CSE 64%
- ◆ B.E. : IT 68%
- ◆ Diploma : CT 61%

#### 7) Aviato Consulting , Gujarat Role: Software Engineer (Contract)

Feb 2025 - Sep 2025

Domain : Insurance

##### Project : Prudential (Australia)

This project is for insurance agent selection. onboarding etc.

Task: Developed backend Kotlin APIs and conducted testing using Postman.

work in different domain like candidate onboarding, agent etc

Implemented email services using Twilio SendGrid to handle SMTP and web API functions.

Worked on a NestJS backend to fetch and create APIs for candidate lists, referencing YAML files.

Performed unit testing and resolved Codacy issues after pull requests.

· Tech stack: kotlin, nestjs, open API, intellij,vscode, Insomnia,DSA ,JSON, open api specification

#### 6) Iron Logic Digital Labs Pt. Ltd. , Punjab Role: Java Software Engineer L2

May 2024 - Oct 2024

Domain : Ecom

##### Project : 360BuyFlow - Rogers (Canada)

This project is for Canada's wireless services and entertainment, display the Internet & TV offers

Task: To write java backend API code and test in postman using JWT token.

Refer Figma design and create page in contentful then consume it in UI using Angular 16.

Document steps to raise access for CDN, jfrog, github, dynatrace, Akamai etc

Write code for service class, controller class etc and unit test them.

Deployment of 360BuyFlow project

· Tech stack: Java, Spring Boot, REST API, intellij, Postman,DSA ,JSON, gradle, swagger

Azure Devops, kubernetes, contentful CDN, Dynatrace, Agile - Scrum model.

#### 5) MOHS10 Technologies Pvt Ltd, Orisha Role: Sr. Product Engineer

May 2023 - Dec 2023

Domain : Ecom , Medical

##### Project : Ekwithree - Consilx (Singapore)

This project is for medical domain. My task was to implement JWT authentication.

Coding in python using Chalice framework to extract user name from header encrypted data.

· Tech stack: Java, Spring Boot, REST API, Eclipse, Postman, Data Structure and Algorithms ,JSON

Python - Chalice framework, Slack, AWS - s3 bucket, Agile - Scrum model.

##### Project : LyncOrganic - Admin & Mobile

This project is designed as per central govt requirement. Here Organic crops are buyed and sold.

LyncOrganic Admin will manage user permissions, product etc. We followed Agile - Kanban model.

Writing API end points for Admin, Seller, Buyer : product -> add, edit, update

· Tech stack: Java, Spring Boot, Intllije, Postman, trello, MySql, GitHub Desktop ,JSON ,yaml

Data Structures and Algorithm

- Wrote APIs and tested
- Write code for service class, controller class etc and unit test them.

4) **Xebia IT Architect India Pvt. Ltd. , Pune**

May 2022 - jan 2023

Role: Sr. consultant

Domain : Banking

**Project : Admin and User project for YesBank**

Writing API end points and test cases for Admin project by using springboot REST API JUnit

Perform Unit testing using Junit - mockito and Load testing on Postman

Generate adapter file and deploy it on server by IBM mobile app

check logs on server and extract encryption data to send it in postman header

Inspect mobile app on chrome and test app. From SDLC we followed Agile- Scrum model.

· Tech stack: Java, Spring Boot, REST API, JIRA, tortoise SVN, Git version control, Sonar , Jacoco, SQL dev.

VDI, winscp, putty, Data Structure and Algorithm ,JSON ,yaml, swagger

3) **Zensar Technologies , Pune**

Feb 2021 - May 2022
