ACADEMIC PROJECTS

Netflix Data Prediction

In this data set we have a data set given which includes the shows and movies that are available on on Netflix with their cast, directors and Ratings. We analyze the ratings and categories of movies and shows that are most popular. In this we used Pandas, Seaborn and matplotlib library of python.

We created the visualization Dashboard on Tableau for the better understanding of data.

Prediction of Diabetes in Patient

Predict whether a patient is diabetic or not from the other factors like Insulin level, Age, Glucose level etc. with the help of Machine Learning algorithm like Classification in python from sklearn library.
